Stamp 1G Eligible – No Sponsorship Required

PROFILE

Recent CS & Software Engineering graduate from Maynooth University, graduating with First Class Honours. Led frontend development on a Microsoft-mentored passkey authentication system awarded 100%, built a full-stack iOS app with Firebase, and spent six months automating enterprise workflows at UNUM as a Pega CSA certified engineer. Driven by meaningful work and continuous learning. Stamp 1G eligible, available August 2026.

EDUCATION

BSc Computer Science & Software Engineering

Maynooth University, Ireland

Sept 2022 – June 2026

First Class Honours: 80%

Semester Abroad

Boston College, USA

Aug – Dec 2024

EXPERIENCE

Digital Process & Automation Intern · UNUM

Feb 2025 – Aug 2025

- Automated 10–12 business workflows using Pega and Constellation within a 10-person Agile team, streamlining internal processes and reducing manual effort; earned Pega CSA certification
- Delivered 10+ user stories end-to-end within Agile sprints including writing, unit testing, debugging and merging code on the Pega platform with senior developer review

Lab Demonstrator · Maynooth University

Oct 2025 – May 2026

- Support ~120 students across Theory of Computation, Databases, and Software Engineering & Processes by running lab sessions, marking work, and providing one-to-one guidance each term

PROJECTS

Password-less Biometrics Authentication — Microsoft (100%)

Feb – May 2024

React · Node.js · Express · MongoDB · TypeScript · SimpleWebAuthn · Azure

- Led frontend development in a 6-person team to deliver a full passkey authentication system supporting fingerprint and facial recognition across web and mobile
- Mentored directly by Microsoft engineers through weekly design reviews; awarded 100%

ECG Monitoring & SHD Detection — Final Year Project

Oct 2025 – May 2026

Python · PyTorch · TensorFlow/Keras · Pandas · NumPy · ResNet-1D · PhysioNet

- Adapted a pretrained multi-lead ResNet-1D for single-lead SHD detection using a custom lead-masking approach; achieved AUROC 0.74 / AUPRC 0.68
- Applied transfer learning and time-series classification on PhysioNet dataset, showing promising performance for low-resource and wearable cardiac screening

SafarNama iOS App (88%)

Aug – Dec 2024

Swift · SwiftUI · Firebase Storage · Firebase Authentication · MVVM · Xcode

- Built an iOS city-discovery app integrating Firebase Authentication and storage with real-time location tracking, user-generated notes, photos, and reviews
- Architected with MVVM for scalable, maintainable code

Intern Security Challenge — UNUM

May – Aug 2025

Opengrep · Semgrep · Static Analysis · Application Security

- Built custom open-source security tools using Semgrep and Opengrep to detect vulnerabilities in application code, aiming to replace Veracode which costs \$100k+ annually
- Presented the final solution to 300+ UNUM employees

SKILLS

Languages: Python, Java, JavaScript, TypeScript, HTML/CSS, SQL, Swift

Frontend: React, SwiftUI, HTML/CSS, TypeScript

Backend: Node.js, Express, Spring Boot, REST APIs

ML / Data: PyTorch, TensorFlow/Keras, scikit-learn, Pandas, NumPy, Time-Series Analysis

Databases & Cloud: MongoDB, Firebase, Azure, Docker

Tools & Practices: Git, CI/CD, Agile/Scrum, GitHub, Unit Testing
